

The FCC should not implement any proposal that would lessen the Indiana Telephone Privacy Law protections. The Indiana Privacy Law has made my time at home with my boy's more enjoyable. Now I don't have to worry about getting sales calls to interrupt our time together. There used to be days we would get 5 calls, now we don't get 5 calls a month. So please don't take my time away from my family again by lessening the Indiana Telephone Privacy Law.

Sincerely,
Donald E Kidd
